MERRYFAIR®

Saville

SEATING EXCELLENCE AT WORK

Like a good well-tailored suit, **Saville** combines exceptional workmanship and attention to detail with a lightness of design.

A distinct expression in shape is conveyed by the light transparent netting of the backrest, shaped like a tight sail. A structure that provides effective lumbar support as well as conveying a feeling of lightness and harmony.

Saville is everything to everybody, representing sophistication in design, simple operation and feeling good at the office.

Saville features an advanced mechanism with multi-position recline locking. Recline tension is adjusted using a side crank for convenient operation.

Upholstery is offered in 4 choices:

High-tensile polyester mesh,
Thin leather padding,
Soft leather cushions, or
Combination of leather seat cushion and mesh backrest.

This is stretched over a diecast aluminum frame to create a strong yet elastic suspension for optimum body support.

The armrests are also made of diecast aluminum, and covered by an armpad of PU integral foam for a soft-touch tactile quality and durability.

A 5-prong base of diecast aluminum is equipped with 60mm diameter castors for low rolling effort.

All aluminum parts are finished in chrome-plating for an attractive appearance and easy cleaning. All aluminum and steel parts can be disassembled using common tools and are 100% recyclable at the end of product lifecycle.
