

FlexiSpot

Ergonomic Fitness Chair V6

RIDING

SITTING

Office Chairs And Fitness Bikes

“So intelligent, sitting in it allows you to ride involuntarily”

“the body is the capital of work”, in the context of global COVID-19, exercising can improve immunity and fight viruses more effectively. However, Spending too much time sitting in front of our desks or staring at the computer, moving nothing but our fingers, can make us stiff and tired.

Flexispot continues to pay attention to ergonomic design, and has been studying the relationship between people and work for 20 years. For the harmony of body and work, we will continue to improve the fitness chair.

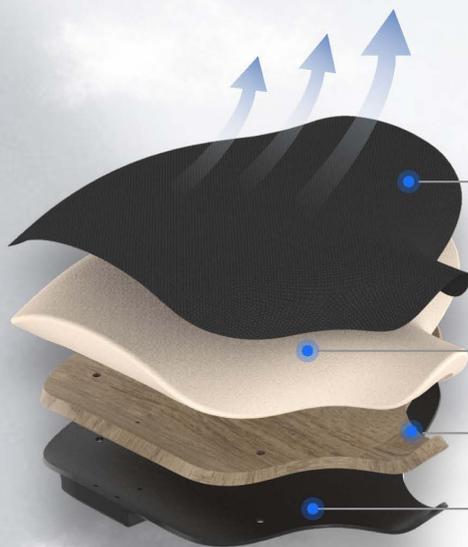

V6 stands for the latest milestones in fitness-chair development, which makes your work healthier and more leisurely. The office chair is perfectly integrated with the exercise bike, allowing you to enjoy cycling while you sit and work.

Perfect Office Chair

"you are floating, liking being in the clouds" the moment you sit down. The wing-like seat cushion adopts high elastic sponge to support the body evenly, which reduces stress and encourages you to exercise.

- **Breathable mesh**
- **Elastic sponge pad**
- **Thick wood**
- **Nice shell**

You can switch between sitting or riding positions by adjusting the seat to move up or down, back or forth. The backrest inclination and spine support can also be adjusted to fit the curve of your back, allowing you to achieve a balanced, relaxed posture.

HEADREST

Adjust the height and angle of the headrest, to make the head more comfortable

BACKREST

Tilt 0-12°, to meet the needs of different sitting postures

ARMREST

The armrest can be raised or rotated horizontally, - making your arm more comfortable and free

SPINE SUPPORT

Adjust the spine support frame to make your spine more relaxed

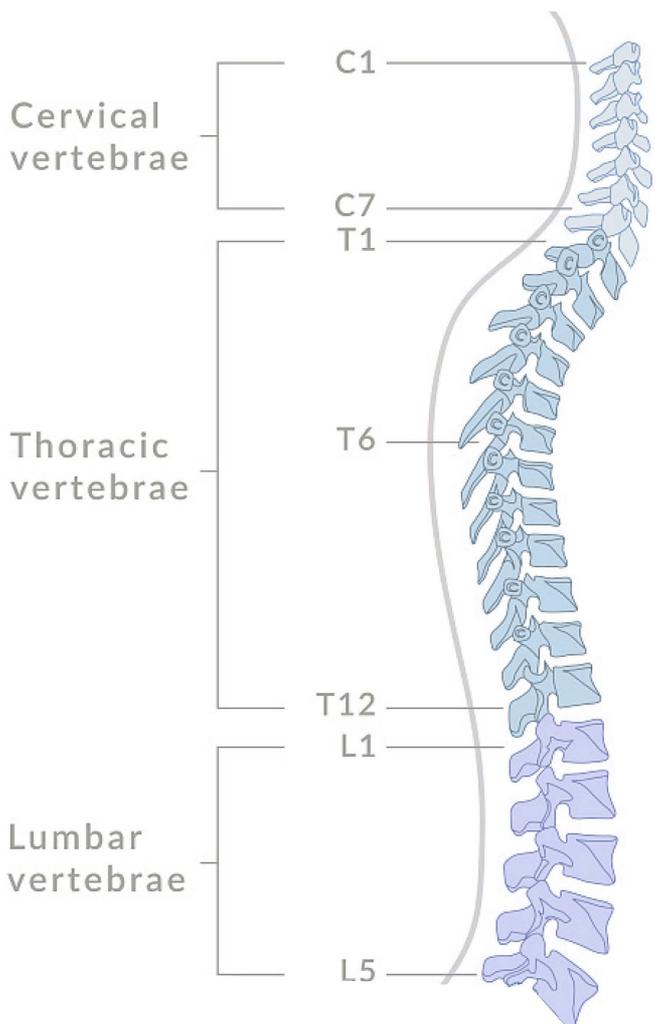

CUSHION

Cushion makes your ride more comfortable and can be slid back - and - forth

GAS SPRING

Suitable for people of different heights

PROTECT THE CERVICAL VERTEBRA

SHOULDER SUPPORT

SUPPORT THE LUMBAR SPINE

Y-SHAPED SEAT BACK SUPPORT

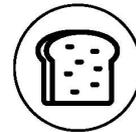

WIDENED AND THICKENED STABLE Y STRUCTURE, MORE LOAD-BEARING

Fitness Bike
